Priority Applications (No Type Date): DE 2423790 A 19740516

Abstract (Basic): DE 2423790 A

Tampon fro female hygiene consists of an absorbent body w
recovery cord composed along its length partly of non-heat sh
material and partly of heat-shrinkable organic synthetic mate
heat-shrinkable material enables the cord to fold or coil its
independently of the compsn. and method of prodn. of the tamp
Pref. the cord is securely fixed to the centre of the wound-u
blank so that it extends freely from one end. A tacking stitc
shrinkable yarn may extend over the full length of the cord,
otherwise consist of cotton or cellulose not shrinkable when
After heat treatment the cord coils or folds up naturally due
asymmetric shrinkage.

Derwent Class: D22; P32
